

Formatting Tags

These tags help structure the content of your web page, making it more readable and visually appealing.

Paragraph tag: Defines a paragraph.

Ex: `<p>This is a paragraph</p>`

Bold tag: Defines bold text.

Ex: `bold`

Strong tag: Defines important text usually displayed in bold.

Ex: `important`

Italic tag: Defines italic text. It doesn't convey any extra emphasis.

Ex: `<i>italic</i>`

Emphasis tag: Defines emphasized text, usually displayed in italics.

Ex: `emphasized`

Underline tag: Defines underlined text.

Ex: `<u>underlined</u>`

Delete tag: Defines text that has been deleted from a document.
(strikethrough)

Ex: `deleted`

Quotation tag: Defines a short inline quotation.

Ex: `<q>This is a quote.</q>`

Preformatted text tag<pre>: Defines preformatted text. Text within this element is displayed in a fixed-width font and preserves both spaces and line breaks.

Ex: `<pre> This is`

preformatted text.

`</pre>`

Blockquote tag: Defines a section that is quoted from another source. Browsers typically indent this text.

Ex: <blockquote> This is a blockquote. </blockquote>

Keyboard input tag: Defines keyboard input. Browsers typically render this text in a monospace font.

Ex: <p>To Copy press <kbd>Ctrl</kbd> + <kbd>C</kbd>.</p>

Subscript: Defines subscript text, which is usually rendered with a lowered baseline.

Ex: <p>This is a subscript: H₂O</p>

Superscript Defines superscript text, which is usually rendered with a raised baseline.

Ex: <p>This is a superscript: E = mc²</p>

Mark tag: Defines text that should be marked or highlighted.

Ex: <mark>highlighted text</mark>

Abbrivation tag: Defines an abbreviation or acronym, and it can provide a tooltip with the full version when hovered over.

Ex: <p>The <abbr title="World Health Organization">WHO</abbr> </p>

Marquee tag: Defines a scrolling text or an image (not standard in HTML5 and is deprecated).

Ex: <marquee>Scrolling text from left to right by default</marquee>

Address tag: The <address> tag usually renders the text in italic and adds a line break before and after the element by default.

Ex:

<address>

Abhinav

Manugur

9959768307

</address>
